To Whom It May Concern:

This letter confirms that Master Control Systems, Inc. has been granted Make It American™ Process Certification, a program administered by the National Electrical Manufacturers Association (NEMA).

To earn this certification, Master Control Systems, Inc. completed an independent, third-party audit that included an on-site facility visit and a review of its manufacturing operations, including documented manufacturing processes, sourcing methodologies, and domestic content calculation procedures designed to support compliance with the Buy America Preference established under the Build America, Buy America (BABA) Act. NEMA approved certification following successful completion of that review.

Please note that Make It American™ is a **process** certification, not a product certification. It confirms that Master Control Systems, Inc. maintains the documented systems and controls necessary to manufacture BABA-compliant products at the facility identified below. It does not certify that every product manufactured at this facility is BABA compliant. This certification is provided for informational purposes only and does not constitute a representation or warranty by NEMA regarding compliance with any applicable law or project-specific requirement.

Accordingly, purchasers seeking BABA-compliant products must confirm the compliance status of each specific product directly with Master Control Systems, Inc. during the purchasing process. Master Control Systems, Inc. can provide product-specific compliance documentation upon request.

**NEMA Make It American™ Process Certification Number:**
NEMA-00-7

**Certified Facility:**
Master Control Systems, Inc.
910 North Shore Drive
Lake Bluff, Illinois
United State of America

**Certification Effective Date:** June 9, 2025
**Certification Expiration Date:** June 9, 2028
**Registered Since:** June 9, 2025

Adherence to the program's process requirements is assessed through annual surveillance audits. Further clarifications regarding the scope of this certificate and the applicability of NEMA 70901-2024 standard requirements may be obtained by consulting NEMA.
